Subject: Elmer's Purposed Commercial Driveway Sight Distance Review
Attachments: Elmer's Commercial Drive Proposal 2017.pdf

Hi Tammy,

Here is the sight distance for each of the sights Steve and looked at. The best location for sight distance is proposed sight number 2. With 1,050 feet sight distance to the West and over 1,200 feet to the East. This location is approx. 160 feet to the East of existing driveway. This sight will give traffic on Pickerel Lake road the most amount of sight distance to be able to see and react to slower moving traffic.

If there is any changes that you would like to have made please let me know.

Hope you are having a good day,

James Godzik
